

PROFESSIONAL PEST MANAGEMENT

COMPLETE COCKROACH CONTROL, WITHOUT THE CALL BACKS.

 **Advion[®] Cockroach**
Gel

syngenta[®]

ADVION Cockroach Gel is not only irresistible to cockroaches; as a leading bait solution, its powerful mode of action controls the entire population. Use it once and trust it will work the first time – resulting in more satisfied clients and less call backs for your business.

THE BENEFITS

Fast control of the entire colony

- ▶ Spend a bit to save a lot – ADVION quickly and thoroughly spreads throughout the entire cockroach population for complete control, meaning less call backs
- ▶ Highly attractive and palatable to a wide variety of cockroaches, including German, American, Brownbanded, Australian and Oriental
- ▶ Great for harborage, crack and crevice application

Product of choice for sensitive areas

- ▶ HACCP certified, making it suitable for food handling places
- ▶ Ideal for schools, hospitals and other settings

Convenient and easy to use

- ▶ Gel is easy to apply and stays where it is placed
- ▶ Can be easily partnered with ARILON Insecticide for even more effective control

FOR LIFE UNINTERRUPTED™

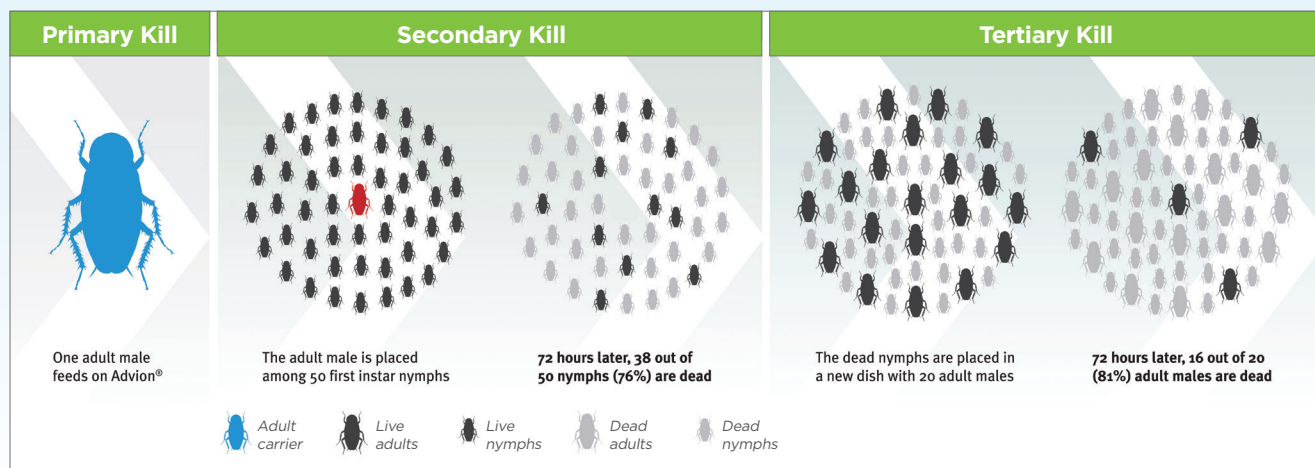

®

THE SCIENCE

HOW DOES ADVION ERADICATE THE ENTIRE COCKROACH COLONY?

ADVION is powered by indoxacarb: an active ingredient with a unique mode of action that spreads rapidly to other cockroaches. Once a cockroach is exposed, it unleashes a three-step chain reaction.

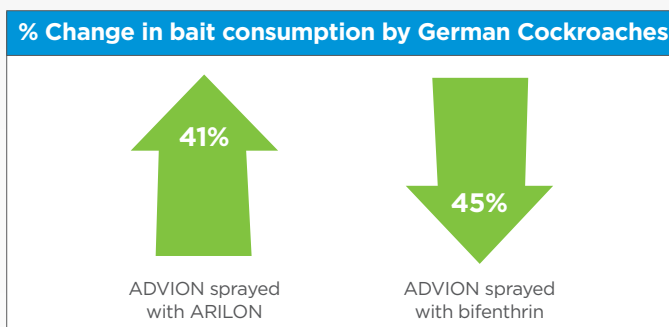

ADVION is spread through the population through normal cockroach behaviours (e.g. ingestion of faeces and secretions), resulting in the quick elimination of cockroach infestations.

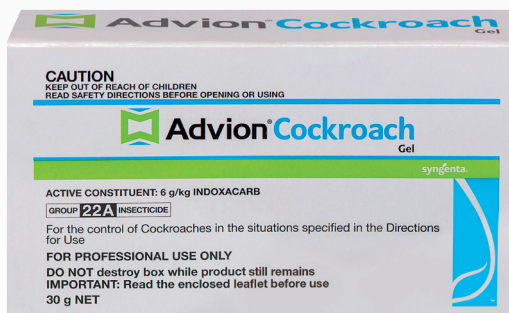

TIPS FOR USE

- ▶ Partner ADVION Cockroach Gel with ARILON Insecticide in situations where superior cockroach control is needed, such as in commercial kitchens, warehouses and areas with persistent infestations
- ▶ Applying ADVION over the top of ARILON not only improves uptake of the active ingredient; it also speeds up control and delivers a broader, longer-lasting treatment zone compared to using ADVION alone
- ▶ This pairing can also deliver results in jobs that have previously been resistant to other treatments

Note: Never apply synthetic pyrethroid products with ADVION gels, as this will slow both the consumption of bait and control of the population.
