

CIDETRAK[®] IMM

MATING DISRUPTANT FOR INDIAN MEAL MOTH

The Most Effective Moth Control Product available on the market today!

*Broad Spectrum, Non-Toxic, No Residue, Fits Every Market Segment,
Low Cost, Long Lasting, Full Season Protection*

Insect mating disruption is extensively used in global agriculture.

At Trécé we are proud to bring this proven technology and our latest technological concept in integrated pest management, the **NEW CIDETRAK® IMM**, an intelligently simple high performance dispenser for Indianmeal Moth mating disruption. Designed to prevent mating, by sending Indianmeal Moths into a state of confusion - the male cannot find the female.

Features:

- Prevents mating
- 3-way effect on mating
- Often more effective than insecticides over time
- Continuous preventative strategy
- Broad spectrum for many moths
- Works in multiple environments
- Non-toxic
- Reduces toxic insecticide use
- Reduces frequency of toxic space treatments

Benefits:

- Reduces or eliminates larvae and populations
- False trail following, trail masking and antennal overload
- Cost effective insect management
- 24-7 results
- One easy application; economical
- Flexible and effective for sensitive users
- Less interruption from plant shutdowns for insect control
- Reduced worker and consumer concerns
- Less interruption, labor cost savings, less residue

Commodities/Facilities:

Storage:

Birdseed storage & packaging
Cocoa bean storage
Coffee bean storage
Dry bean storage
Grain storage
Peanut and other Nut storage
Popcorn storage & packaging
Spice storage & packaging

Food Processing:

Chocolate/confectionery manufacturing
Cereal & Baked goods manufacturing
Pasta manufacturing
Pet food manufacturing
Other food processing manufacturing

Distribution Centers:

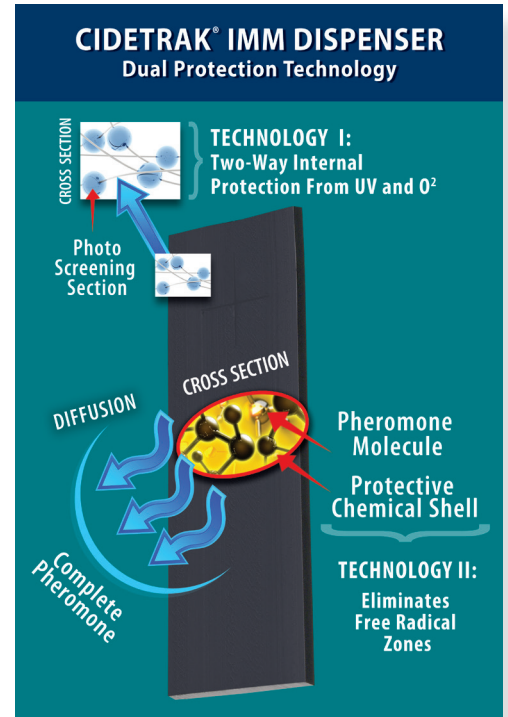

Retail

Retail Stores:

Grocery and Pet

Insects:

- **Indianmeal Moth**,
