## ANOTEC PRO5L - ODOUR PROFILING

A highly concentrated water soluble liquid phase odour control formulation. Anotec® PRO5L is intended for use as a liquid additive to malodorous (smelly) solutions and acts as an odour profiling agent. Odours inherent in any base product are significantly reduced and/or eliminated without affecting the efficacy or chemistry of the client's product. Gone are the days when Pest Control meant asking your clients to stay away from their house for hours if not days to avoid the smell!

## HOW TO USE ANOTEC PRO5L

### **Pesticide | Herbicide Applications:**

**Add 10-mls of Anotec PRO5L to any 400-L chemical solution**

### **Crack | Crevice:**

**Applications Add 5-10-mls Anotec PRO5L to 10-Litres of chemical solution. Mix well by agitating container side to side**

### **Stand Alone Product:**

**Odour Control (Dead Rat Odours) Anotec PRO5L is ideal for use as a odour control solution for those hard to reach odours resulting from dead rats and other vermin. Dilute the product and apply via an Anotec Fogmaster or manual back spraying apparatus.**

### **ALSO IDEAL FOR USE IN:**

- >All wastewater type odours
  - >Sewage installations
  - >Amine type odours
  - >Organic & some inorganic compounds such as H<sub>2</sub>S
  - >As an additive to paint or resin formulations
-
