<td>Mice &amp; Brown or Norway Rats (Rattus norvegicus)</td>
<td>For use in and around (within 2 metres) industrial, commercial, public services, domestic, agricultural buildings (machinery sheds etc.)</td>
<td>For mice: use up to 10g (a bead 10 cm long by 1 cm diameter) per bait point. For rats: use up to 50g per bait point</td>
<td>Explore the site and locate runs, nests, burrows, droppings and signs of damage. Eliminate as far as practical, all alternative food sources. Place baits where drops occur over the days. Use weather resistant bait stations when using bait outdoors.</td>

**SAFETY DIRECTIONS**

Poisonous if swallowed. May irritate the eyes. Repeat minor exposure may have a cumulative poisoning effect. Avoid contact with eyes. Vitamin K1 (phytomenadione) is antidotal. Wash hands after use.

**FIRST AID**

If poisoning occurs, contact a doctor or Poison Information Centre. Phone 13 11 26. Vitamin K1 (phytomenadione) is antidotal.

**MATERIAL SAFETY DATA SHEET**

Additional information is listed in the Material Safety Data Sheet.

**NOTE TO PHYSICIAN AND VETERINARIANS**

Difenacoum, the active constituent of Sorexa® Pro Rodenticide Gel, is a long-lasting anticoagulant chemical, which if ingested by humans, domestic animals or pets, can reduce the clotting power of the blood and haemorrhage may result. Vitamin K1 (phytomenadione) should be administered urgently by medical, appropriate para-medical personnel or veterinarians. If administered intravenously the injection must be given slowly.

**MANUFACTURER’S WARRANTY AND EXCLUSION OF LIABILITY**

This product as supplied is of a high grade and believed to be suitable for any purpose for which it is expressly recommended and must be used in accordance with the Directions for Use given on the label. No responsibility is accepted in respect of the product save those non-excludable conditions implied by any Federal and State legislation or law of a Territory.
